DETAILED ACTION

Election/Restrictions

1. Claims 19-27 withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply by telephone on 12/17/1008.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 12/05/2005 was considered by the examiner.

Claim Objections

3. Claims 4-18 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1 and 2 rejected under 35 U.S.C. 102(b) as being anticipated by Logie (US Patent 3,876,110).

In Re claim 1 with reference to Figure 1 Logie discloses an ice-cream dispenser comprising a refrigerated housing (11) and a plurality of containers (13). With reference to Figure 10 Logie discloses a means for distributing said ice-cream (17). With reference to Figure 18 Logie discloses a rotating base (84) having a tray (80) which is positioned under one of said containers. Logie also discloses a programming means (Abstract). The examiner notes that an automatic machine, as disclosed in the abstract, inherently possesses programming means.

In Re claim 2 with reference to Figure 1 Logie discloses cylinders in a substantially vertical position (13).

Allowable Subject Matter

6. Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Meyer (US Patent 4,628,974) discloses a dispensing station using a rotating tray. Wise (US Patent 2,934,872) discloses an ice-cream dispensing apparatus using a rotating tray and a single ice-cream source. Fox (US Patent 6,202,895) discloses a cosmetic dispenser having a similar structure to applicant's containers and distributing means. Howe (US Patent 1,397,520) discloses an ice-cream dispenser utilizing vertically oriented storage containers.
